

# OVERVIEW OF CLINIC ON PROPERTY

On our mission trip in 2015 we were approached by Peter Dimba, a member of the Malawian Parliament, who asked us if we would build a clinic for the villages that surround the orphanage.

In cooperation with the chiefs we were given an additional 10 acres of land.

This clinic will not only provide care for our children but will provide medicine and care for 100's of those who would otherwise have to travel great distances for help.

We have been promised by the government an ambulance will be kept at this clinic.

## Update 2016 Photos of Clinic

Back side of clinic

Front side of clinic

**This clinic will be life-saving to many individuals. We will build two staff houses for doctors, which the government promised to supply along with an ambulance, and medicine for the clinic.**

**Little did we realize as we agonized whether to commit to this project in 2015 that the government would partner with us to provide an ambulance, medicine and 2 doctors!**

**Even greater than these, they chose our area to provide electricity. The poles and wire are now only a few miles from our location. The building of a clinic was the main reason our area was chosen, as no medical facilities existed in our area.**
